**E. Will you add or subtract to get the answer for the following ? Solve the problems where you have to subtract.**

1. A book has 260 pages. Rita has read 87 pages. How many more pages does she have to read ? (Add / Subtract)
2. A baker made 500 cup cakes. He sold 264 cup cakes. How many cup cakes were not sold ? (Add / Subtract)
3. David read 225 pages of a book. He has to read 85 more pages to finish the book. How many pages does the book have ? (Add / Subtract)
4. Children counted flowers in their school garden. There were 262 roses and 325 lilies. How many more lilies than roses were there ? (Add / Subtract)

### PROPERTIES OF SUBTRACTION

1. When a number is subtracted from itself, the difference is always 0.

$$\begin{array}{r} 209 \\ - 209 \\ \hline 0 \end{array}$$

**Fill in the blanks.**

$$282 - 282 = \underline{\quad\quad\quad} \quad 600 - 600 = \underline{\quad\quad\quad} \quad 888 - 888 = \underline{\quad\quad\quad}$$

2. When 0 is subtracted from a number, the difference is the number itself.

$$\begin{array}{r} 417 \\ - 0 \\ \hline 417 \end{array}$$

**Fill in the blanks.**

$$852 - 0 = \underline{\quad\quad\quad} \quad 777 - 0 = \underline{\quad\quad\quad} \quad 450 - 0 = \underline{\quad\quad\quad}$$

### Exercise 3.1

**Subtract the following.**

1.  $404 - 404 = \underline{\quad\quad\quad}$
2.  $600 - 600 = \underline{\quad\quad\quad}$
3.  $700 - 0 = \underline{\quad\quad\quad}$
4.  $905 - 905 = \underline{\quad\quad\quad}$
5.  $908 - \underline{\quad\quad\quad} = 908$
6.  $614 - \underline{\quad\quad\quad} = 614$

## SUBTRACTION WITHOUT REGROUPING

**Example :** Subtract 3245 from 7968.

Subtracting 4-digit numbers is just like subtracting 3-digit numbers.

Arrange the numbers one below the other, according to their place values. The greater number should be above the smaller number.

Subtract, starting from the ones.

**Step 1 :** Subtract the ones.

**Step 2 :** Subtract the tens.

**Step 3 :** Subtract the hundreds.

**Step 4 :** Subtract the thousands.

#### B. Subtract these numbers.

1.  $6726 - 2125$

2.  $7836 - 2124$

3.  $9385 - 3142$

4.  $8495 - 2144$

5.  $9678 - 5464$

6.  $9674 - 5541$

## SUBTRACTION WITH REGROUPING

**Example :** Subtract 3786 from 7864.

**Step 1 :** Subtract the ones.

Since  $6 > 4$ , regroup the tens.

You have 5 tens and 14 ones;  $14 - 6 = 8$ . Put 8 in ones place.

**Step 2 :** Subtract the tens.

Since  $8 > 5$ , regroup the hundreds.

You have 7 hundreds and 15 tens;  $15 - 8 = 7$ . Put 7 in tens place.

**Step 3 :** Subtract the hundreds.  $7 - 7 = 0$

**Step 4 :** Subtract the thousands.  $7 - 3 = 4$

## SUBTRACT NUMBERS WITH ZEROS

**Example :** Subtract 5423 from 8000.

**Step 1 :** Since  $3 > 0$ , regroup the tens. But there are 0 tens.

So, regroup the hundreds. But there are 0 hundreds.

So, regroup the thousands.

You have 7 thousands and 10 hundreds.

**Step 2 :** Now, regroup the 10 hundreds.

You have 9 hundreds and 10 tens.

**Step 3 :** Now, regroup the 10 tens.

You have 9 tens and 10 ones.

**Step 4 :** You finally have 7 thousands, 9 hundreds, 9 tens and 10 ones. Now, subtract 5423 from it in the usual way.

## ESTIMATING THE DIFFERENCE

We shall now learn to estimate the difference between the given numbers and compare it with another number.

**Example :** Estimate the difference of 728 and 445. Will it be more than 300 or less than 300 ?

**Solution :** We know that  $700 - 400 = 300$ .

Here,  $728 > 700$  and  $445 > 400$ ,  
but both are not equally greater.

So, we can estimate that  $728 - 445$  will be less than 300.

When we actually subtract, we get 283 as the difference, which is less than 300. So, our estimation is correct.

## PROBLEMS ON SUBTRACTION

**Example 1 :** What should be added to 3389 to get 5800 ?

**Solution :** We have to subtract 3389 from 5800.

	Th	H	T	O
	5	<del>8</del> <sup>7</sup>	<del>0</del> <sup>9</sup>	<del>0</del> <sup>10</sup>
-	3	3	8	9
	2	4	1	1

Hence, 2411 should be added to 3389 to get 5800.

**Example 2 :** Find the difference between the largest and the smallest 4-digit numbers formed using the digits 4, 1, 2, 5. Each digit should be used once only.

**Solution :**

The digits are 4, 1, 2, 5.

The largest 4-digit number formed = 5421

The smallest 4-digit number formed = 1245

Their difference =  $5421 - 1245 = 4176$

### Exercise 3.6

1. What should be added to 1600 to get 2000 ?
2. The sum of two numbers is 2894. If one of them is 1750, find the other number.
3. Mohan's monthly income is ₹ 8007 and his monthly expenditure is ₹ 4690. How much does he save every month ?
4. There are 7339 books written in different languages in a bookshop. If 3588 of them are written in English, how many books are there written in other languages ?
5. Which number is smaller 7258 or 7285 and by how much ?
6. The sum of two numbers is 7889. If one of them is 2880, find the other number.
7. A factory produced 8550 bulbs. Out of them, 4599 bulbs were supplied to distributors. How many bulbs are left now ?

8. There are 7750 eggs in a poultry. Out of them, 3478 eggs are sold. How many eggs are left now ?
9. Two persons donated a total sum of ₹ 9000 for flood-relief fund. If one of them donated ₹ 6325, find the donation of the other person.
10. There are 4550 students in a school. If the number of boys is 2429, find the number of girls.
11. Find the difference between the largest and the smallest of 4-digit numbers formed using the digits 2, 5, 7, 0. Each digit should be used once only.
12. By how much is 3458 less than 7000 ?
13. From the largest 4-digit number, subtract the :  
(a) largest 3-digit number (b) smallest 3-digit number
14. There are 6400 bags of wheat in a godown. If 2948 bags are sold, how many bags are left in the godown ?

## RELATION BETWEEN ADDITION AND SUBTRACTION

Addition means to put together. Subtraction means to take away.

If you put together 2 and 3 you get 5.  $2 + 3 = 5$

If you take away 2 from 5 you get 3.  $5 - 2 = 3$

If you take away 3 from 5 you get 2.  $5 - 3 = 2$

Therefore, addition and subtraction are the opposite operations of each other.

## CHECKING SUBTRACTION BY ADDITION

The relationship between addition and subtraction helps us. Use addition to check the answer to a subtraction problem.

To check the answer to a subtraction problem, add the difference to the smaller number. You should get the greater number.

**Example :** Jack subtracted 231 from 354. His answer was 123. Is the answer correct ?

**Solution :**

	H	T	O
	3	5	4
-	2	3	1
	1	2	3

Check :

	H	T	O
	1	2	3
+	2	3	1
	3	5	4

→ difference  
→ smaller number  
→ greater number

Therefore the answer is correct.

### Exercise 3.7

This is Ankit's test paper. Check his subtractions using addition. Give him a ★ for every correct answer. One is done for you.

### WORD PROBLEMS ON ADDITION AND SUBTRACTION

**Example :** Vijay had ₹ 9000. He bought a sofa for ₹ 2500 and a scooter for ₹ 5800. How much money is left with him ?

**Solution :**

Cost of sofa	= ₹ 2500	
Cost of scooter	= ₹ 5800	
He spent	= ₹ 2500 + ₹ 5800 = ₹ 8300	
Money left with him	= ₹ 9000 - ₹ 8300 = ₹ 700	

### Exercise 3.9

- Mr Verma earns ₹ 6250 per month and Mrs Verma earns ₹ 3690 per month. If they spend ₹ 7550 per month, how much do they save ?
- A school library had 7814 books. 986 books were added to the library during the year. 439 torn books were thrown away. How many books does the library have now ?
- 4500 cold drink bottles were loaded in a truck. 1475 bottles were delivered in one shop and 1950 bottles in another shop. How many bottles were left in the truck ?

## MATHS LAB

**Objective :** To subtract 2364 from 3518 using cubes (thousands), sheets (hundreds), strips (tens) and slips (ones)

**Materials Required :** Use cubes, sheets, strips and slips from your Math kit.

**Steps :**

1. Students make the bigger number using cubes, sheets, strips and slips.
2. Ask them what they have to do to subtract 2364 – take away 2 thousands, 3 hundreds, 6 tens and 4 ones. Ask them how they will proceed – will they begin from the ones or from the thousands ?
3. Let them take away the ones, tens, hundreds and thousands in order to get the answer. If the numbers of ones, tens or hundreds are not sufficient show them how to regroup by replacing 1 ten into 10 ones and / or 1 hundred into 10 tens.

4. Repeat the activity several times using different numbers.
